

OPL Galaxy 400, 200 Washer-Extractors

Heavy-duty design.

The foundation of Huebsch washer-extractors' durability is the all-welded structural steel frame. Compared to lighter weight, riveted designs of the competition, Huebsch frames set the standard for extreme durability.

Convenient chemical dispensing.

Our fill-and-forget dispenser lets staff add all chemicals — four in total — at the start of the cycle. That means your laundry workers can be more productive. Huebsch washerextractors also are designed for automatic supply injection systems for greater convenience.

Open, shut and lock with ease.

Our new ergonomically friendly door handles close easily and lock reliably. No more wasted time due to door lock error codes. Huebsch keeps your laundry running at maximum productivity.

Advanced protection where you need it.

Bearing replacement is one of the most expensive repairs to your washer-extractor. Huebsch's triple-lip seals and stainless steel shaft deliver the strongest line of defense in protecting bearings from the damaging effects of moisture long after the warranty period.

Multiple water levels deliver major savings.

With the Galaxy 400 control, Huebsch gives you the power to set water levels to conserve this precious (and often expensive) resource. While many competing models offer just three water levels to choose from, we give you 30. Savings can be as great as 55% compared to older fixed-cycle models. The Galaxy 200 control offers high and low water selections.

Advanced leak detection eliminates wasted water.

We've answered laundry managers' calls to help eliminate the issue of stuck drain valves with our advanced leak detection. Both the Galaxy 400 and 200 models feature a display indicator to let you know if a valve is stuck. No more wasted resources ... or money.

High-speed extraction reduces drying time.

At 100 G-Force, the Galaxy 400 washer-extractor removes more water — as much as a ½ gallon in a 30 lb washer — than many competing models. That means reduced drying time and lower gas consumption for your laundry ... did we mention improved throughput? Huebsch Galaxy 200 models produce extracts of 85 G-Force.

Infrared communication means fast and easy changes to programs.

Managers with the Galaxy 400 control can easily program and retrieve operations data about their machines through a PDA or laptop PC. Simple access to data and easy programming helps save time and ensures proper wash programs are being followed.

Huebsch made-in-America product comes with an industry-leading bond. We warranty the frame, cylinder, shaft, bearings and seals for five years. The entire machine receives Huebsch's standard three year warranty. In addition, Huebsch has more service representatives in the field than most brands have in their whole organization. Huebsch support is further bolstered by an online component and a help line that takes 10,000 calls per year.

*Parts only, labor not included. See Huebsch Warranty Bond for specifics.
